

Phragmites Open House & Panel Discussion

Join us for a free event,
appetizers and door prizes

PIER·B
RESORT

THURSDAY, APRIL 20, 2017

6:00 – 8:00 PM @ Pier B
800 W Railroad St, Duluth, MN

**Free & Open to the Public*

Controlling Invasive Threats in the St. Louis River Estuary

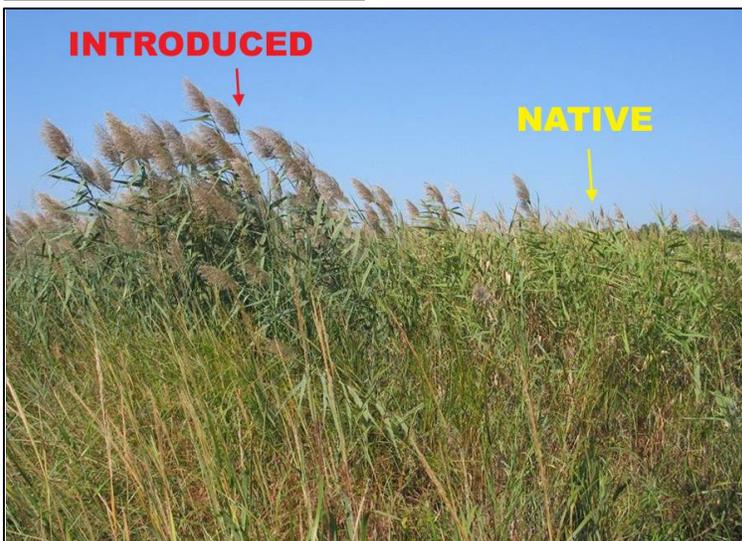

What you will learn from this event:

- *The Story of Phragmites*
- *Why This is Important*
- *What Can Be Done*
- *How to Help*

INTRODUCED

NATIVE

Non- Native Phragmites (European common reed) is an invasive species spreading throughout our community. We have an opportunity to catch the spread early relative to communities in the lower Great Lakes region where infestation has been ecologically and economically devastating. Help protect our local resources and economic backbone!

Join us for a fun and educational event. Learn about this non-native invasive species. Hear about monitoring and treatment. Have your questions answered by experts. Engage with stakeholders to tackle this challenge before it becomes a problem too great to overcome.

**CATCH IT EARLY. STOP THE SPREAD.
PROTECT THE ESTUARY!**

For more information contact the St. Louis River Alliance event coordinator at (218)733-9520.
