

MINNESOTA POINT BEACH NOURISHMENT

2020 proposal

The U.S. Army Corps of Engineers, Detroit District will dredge the Duluth-Superior federal harbor and place material: **Aug 1, 2020 – Sep 30, 2020**

Estimated volume: 50,00 – 53,000 cubic yards

Beach nourishment area: from Duluth S. Pier structure extending 2,500 ft. south east along MN Point between eroded bank and 4 ft depth contour

Short Term Benefits:

- Erosion control
- Protect trees/vegetation
- Provide habitat for threatened/endangered species
- Temporary shoreline protection
